FRONTEND SOFTWARE ENGINEER | REACT, TYPESCRIPT & NODE.JS

Frontend-focused engineer with 4+ years building and supporting Walmart enterprise e-commerce applications through Randstad. Owned seller-facing microfrontends from initial release, delivered workflows across three marketplaces, and built Node.js/GraphQL integrations. Experienced in automated testing, accessibility collaboration, and production support.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, HTML5, CSS3/SCSS, Redux, TanStack Query, Styled Components, accessibility

APIs & tooling: Node.js, GraphQL/federation, REST APIs, pnpm, Nx, Git, monorepos, feature flags

Quality & delivery: Jest, React Testing Library, Storybook, Splunk, Postman, CI/CD (Looper, Concord), A/B testing

ENGINEERING EXPERIENCE

Software Engineer | Randstad USA - Walmart client

Remote | July 2022 - September 2026

- Built and owned the Seller Center enforcement microfrontend from initial release; served as codeowner and delivered account-status, suspension, appeal, and GMV Pause notification workflows.
- Owned React/TypeScript development for IRIS Seller Enforcement, including bulk actions, payment deactivation, reason-code catalogs, and enforcement history across US, Canadian, and Mexican marketplaces.
- Built Node.js orchestration resolvers and GraphQL queries/schemas for Pet Pharmacy and personalized CMS content; maintained high-level designs and service contracts.
- Integrated enforcement APIs and role-based permissions, maintained Jest/React Testing Library tests, and supported controlled releases through feature flags.
- Built shared React components with UX/UI and accessibility teams using design tokens and SASS; maintained Storybook visual tests, Gatsby documentation, and monorepo tests; supported engineers as library SME.
- Created Splunk alerts/dashboards, debugged API calls with Postman, and supported on-call rotations. Participated in A/B, integration, and E2E testing; used Looper/Concord CI/CD and served as Scrum master on assigned sprints.

Software Engineer Apprentice | Snapbrillia

Remote | September 2021 - September 2022

- Resolved full-stack bugs in a MERN application and developed a React website integrated with a headless WordPress CMS through Frontity.

Coding Assistant Instructor | PunchCode

Las Vegas, NV | January 2021 - June 2022

- Explained JavaScript and full-stack development concepts, delivered lectures, and supported bootcamp students.

ADDITIONAL EXPERIENCE

Production Designer | Atrium (Freeman contract) | September 2021 - July 2026. Concurrent exhibit design contracts using AutoCAD and Adobe Creative Suite.

Trade Show Designer | Freeman Company | November 2015 - July 2020. Coordinated exhibit design and production with clients, vendors, and internal teams.

EDUCATION

Associate of Applied Science, Computer Science (Technical Graphics) | Charter College | 2010

Full-Stack Web Development Bootcamp | PunchCode | 2020
